

NERF

2 or 4 players

Aim of the Game

Match colours and slam your Dart cards onto the targets. The player with the highest score when all the Targets are used up is the Nerf champion!

Get Ready

Separate the Target and Dart cards. Shuffle the targets and lay 4 horizontally between the players. Put the rest in a face down pile. Shuffle and deal nine Dart cards to each player – no peeking! Hold the darts in a single stack in your hand. This is your Nerf card blaster!

How to Play

1. Players take turns to count down 3..2..1.
2. On 1 all flip over your top Dart card and try to match at least one of the dart colours to a target. Slam the Dart card onto your chosen target as fast as possible. If your dart matched all the colours on the target you chose, keep that target in front of you. It's yours. Put the Dart card (or cards) on it face down at

the bottom of your card blaster.

3. You must play the dart onto a matching target colour if one is free, even if that means completing a target for another player.

4. If only some of the colours match then that target carries over to the next round, where ANY player can win it by matching the remaining colours.

5. If two players play darts onto the same target and match all the colours, the player whose card hit the target first wins it.

6. If you play at exactly the same time and cannot pick a winner both darts 'bounce' off and go back under your card blaster.

In between rounds, lay out new targets from the draw pile, so there are always 4 on the table.

Winning

Play until all the targets have been used up, or any player runs out of Dart cards. Add up the value of your targets for your final score. The player with the highest score wins.
